Career Objective

Results-driven Python Developer with 3.6+ years of experience in software development, data analytics, and full-stack applications. Strong expertise in building scalable backend systems, RESTful APIs, real-time data pipelines, and analytical dashboards. Seeking a challenging Python Developer role where I can contribute to robust system design, data-driven solutions, and high-performance applications.

Professional Summary

- 3.6+ years of experience in Python Development, Data Analytics, and Software Engineering.
- Strong expertise in Python, Flask, REST APIs, SQL, and Data Processing.
- Hands-on experience in real-time systems, SCADA/PLC integrations, MQTT, and data pipelines.
- Proficient in React.js-based UI development for data visualization and monitoring dashboards.
- Experienced in ETL workflows using Apache Airflow and Apache NiFi.
- Strong background in database design and optimization using MongoDB, Cassandra, MySQL, PostgreSQL.
- Exposure to AI/ML and Deep Learning models for computer vision and analytics use cases.
- Familiar with Agile methodology, Jira, Git, CI/CD pipelines, and cloud platforms (AWS, GCP).
- Excellent problem-solving, debugging, and cross-functional collaboration skills.

Technical Skills

- Backend & Programming: Python, Flask, Flask REST API, Django, RESTful Web Service
- Databases: MongoDB, Cassandra, MySQL, PostgreSQL, SQLite
- Data Engineering & Integration
- AI / ML (Basic to Intermediate): TensorFlow, Keras, CNN, OpenCV
- Tools & Platforms: Git, GitHub, GitLab, Jira, CI/CD Pipelines, AWS, GCP, Agile / Scrum, WebSockets, HTTP Protocol, SQL, Power BI, Excel (Pivot Tables, Charts), Pandas, NumPy, Matplotlib, Apache Airflow, MQTT, PLC, SCADA, OPC Integration

Work Experience

Python Developer

Vividnex Innovations Pvt. Ltd. Nagpur

Client: Persistent Systems Pvt. Ltd.

Pune MH | 1st June 2022 – Present

- Designed and developed RESTful APIs using Python Flask for scalable backend services.
- Built and optimized ETL pipelines using Python, SQL, Apache Airflow, and Apache NiFi.
- Developed interactive dashboards using Power BI for KPI tracking and performance analysis.
- Worked on real-time data ingestion and processing systems for enterprise applications.
- Performed EDA and root cause analysis using Python and SQL to support business decisions.
- Led a sub-team of analysts and developers to improve data quality, reporting accuracy, and system reliability.
- Utilized Jira for sprint planning, issue tracking, and Agile project execution.
- Collaborated with frontend, backend, and DevOps teams to deliver end-to-end solutions.

Data Analyst Intern (6 Months)

Nedient Technology Pvt. Ltd.

Nagpur, MH

May 2021 – Nov 2021

- Performed data extraction, transformation, and loading (ETL) using SQL and Python.
 - Developed Power BI dashboards to visualize business KPIs and trends.
 - Conducted exploratory data analysis (EDA) to derive actionable insights.
 - Implemented proactive monitoring to detect and report data anomalies.
 - Worked in Agile teams using Jira for task and sprint management.
-

Projects

Wind Turbine Monitoring System Application

Feb 2024 – Present

Technologies: Python, Flask, ReactJS, Redux, Apache NiFi, MQTT, MongoDB, Cassandra, MySQL, PLC, SCADA, OPC, AI/ML

- Designed and developed a full-stack real-time wind turbine monitoring and control system (SCADA-based).
- Led the development of interactive React dashboards for turbine performance and operational monitoring.
- Developed and maintained Flask-based RESTful APIs for secure frontend backend communication.
- Implemented real-time data ingestion pipelines from PLC, SCADA, and OPC servers using MQTT.
- Managed high-volume real-time data storage using MongoDB and Cassandra.
- Troubleshoot and resolved issues across UI, backend, and data integration layers to ensure system stability.
- Collaborated with cross-functional teams to deliver scalable and maintainable solutions.

Semantic Segmentation of Water Bodies in Satellite Images

June 2022 – Dec 2023

Technologies: Python, Django, REST API, U-Net, TensorFlow, PostgreSQL, Airflow, NiFi, AWS

- Designed a modular Python-based ML pipeline for data preprocessing, training, validation, and inference.
- Integrated the trained model with Django REST APIs for scalable model inference.
- Orchestrated automated data workflows using Apache Airflow for scheduled model retraining.
- Processed large satellite datasets efficiently using Apache NiFi for ingestion and transformation.
- Deployed the application on AWS, ensuring scalability, reliability, and secure data access.

Face Recognition Attendance System

Client: Western Coalfields Limited

Nagpur, MH

May 2021 – Nov 2021

Technologies: Python, Django, OpenCV, SQLite, MySQL, REST API, AWS, TensorFlow

- Implemented real-time face detection and recognition pipelines using OpenCV and TensorFlow.
- Developed secure role-based authentication for admin and user access.
- Optimized facial feature extraction to improve recognition accuracy under varying lighting conditions.
- Designed REST APIs for attendance retrieval, reporting, and system integration.
- Deployed the system on AWS EC2, ensuring high availability and scalability.

Document Analyzer Using Deep Learning (Self Project)

Technologies: Python, CNN, TensorFlow, Keras, Pandas, Matplotlib

- Designed an end-to-end deep learning pipeline for document indigestion, training, and classification.
- Implemented data cleaning and feature extraction using Pandas for improved model accuracy.
- Fine-tuned CNN architecture and hyperparameters to enhance classification performance.
- Generated analytical reports and visualizations for model evaluation and error analysis.
- Structured the project following production-ready Python coding standards for scalability.

Education

- Master of Business Administration (MBA)
Nagpur University | 2023 – 2025 | CGPA: 6.13
- Bachelor of Business Administration (BBA)
Nagpur University | 2019 – 2022 | CGPA: 8.50

Declaration

I hereby declare that the above-mentioned information is true and correct to the best of my knowledge and belief.
